

Topic: Metallurgy of Nanomaterial's and its application in energy, health and environment: An emerging science.

Date: 04/07/2022

Time: 10:30 am To 12:30 pm

Venue: Conference hall, University of Ladakh, Leh campus.

Department of Zoology and Mathematics of University of Ladakh have jointly organized an expert talk on "Metallurgy of Nanomaterial's and its application in energy, health and environment: An emerging science" on 4th July, 2022. The program was started by Dr. Amjad from the Department of Zoology who gave a brief introduction on the topic headed by welcome speech by Director Madam Konchok Angmo. Then followed by the introduction to Guest Speaker by Dr. Mohd Hussain, Coordinator, Department of Zoology.

The talk was delivered by the expert Dr. Tata Narasinga Rao, Director-in-charge at ARCI. In this session, faculty members of all the departments and students from Mathematics and Zoology Department were participated. Dr. Tata Narasinga Rao shared many innovations done by ARCI on metallurgy of nanomaterial's and some thrust areas they are working on like Powder metallurgy, surface Engineering, Laser processing, Ceramics, Fuel cell technology Li-ion batteries and magnets, Solar energy materials and Nano technology. The talk was followed by questioning and answering session where students and faculties from both the Campuses had asked many questions. Then the concluding talk was delivered by Honourable Vice Chancellor Prof. S.K. Mehta. The program was concluded with votes of thanks to all the participants by Mr. Tundup Namgyal from the Department of Mathematics.
